golf

Clients' satisfaction is our greatest principle!

OBJECTIVES

In 1991 **SIERRACLARA GOLF** was established with the objective of undertaking golf course and tourist-residential resort projects from a comprehensive point of view. Our work covers everything, from the desing phase to the construction phase and the star up of the installations, always from a perspective of respect for the environment.

Our ultimate objective is to achieve a unique and harmonious Golf Course, which forms a homogeneous complex, managing views and privacy, with each hole designed for the space in which it is built favouring diversity, quality and respect for the environment, as a way of attracting and keeping golf players, both amateurs and professionals, and of adding value to the residential complex.

QUALITY

Our clients' satisfaction is our greatest Principle, so we have developed collaborative alliances via technical assistance services for after our work is finished. SIERRACLARA GOLF is certified for: **Design and Technical Assistance for Golf course Projects** in accordance with standards UNE-EN-ISO 9001: 2000 and UNE-EN-ISO 14001:1996. Certifying body: DNV.

PROJECTS

Due to our work philosophy and the adaptive flexibility of SIERRACLARA GOLF, we are presently developing the sports projects within Masters Plan designed by the prestigious studio "**Richard Roger Partnership**".

In the development of these projects we are in close collaboration with companies of recognised international prestige such as the engineering "**OVE & ARUP**". Likewise **SIERRACLARA GOLF** is working jointly

with the North American Architecture and Desing Studio "**Development Desing Goup Inc.**" developing the projects of the Complex "Las Riberas Resort City".

We are presently developing a total of 10 tourist-residential resort projects with golf course in Spain and Portugal.

SERVICES

We offer **Integral Services** in Engineering, Architecture and Golf, including: Desing, Previous studies, Development of projects, Execution and direction of projects, Environmental Impact Studies, Master Plan, Attendance to the process of purchases, Administrative processing, Management of Subsidies, Planning of investments and treasury.

DIFFERENTIATION

- In-depth knowledge of all the **Desing phases**, drafting projects and execution of works.
- **Project Management.** We achive the optimisation of resources, providing the most innovative and profitable solutions to every project. Together with the client we determine the projects's objetives, form, cost, time period and qualidade.
- **Construction Management.** Being able to eliminate the figure of a main contractor, the client sets up a direct contractual relationship with the suppliers, obtaining significant savings and improving the quality of the end result.
- **Training and Experience in the environmental sector**, with works recognised both nationally and internationally in the design and execution of sustainable golf courses.
- **Innovation, design and creativity**, incorporating attractive and distinguishing elements to the projects.
